[Github Profile](#)

## PERSONAL PROFILE

I am MERN Full stack developer with skills in HTML, CSS, JavaScript, Tailwind CSS, and Figma design. I am proficient in ReactJS for front-end development and Node.js and Express.js for back-end development, with a strong understanding of NoSQL databases, specifically MongoDB. I am also well-versed in REST API, as well as version control using Git and GitHub. I am seeking opportunities to contribute as a MERN developer.

- Computer programming
- Coding
- Oral and written communication

## LANGUAGES

- English
- Tamil

## EDUCATIONAL HISTORY

### BA ENGLISH

Government Arts College | 2019 – 2022

## CETRIFICATION

### Meta(Coursera)

- Html /Css
- JavaScript
- React Js
- Version Control
- Figma

### Skill Learning

- Mern Stack

### Projects

#### E-Book (MERN Stack)

- I developed a project using the MERN stack called "e-book." It consists of two sections:
- Client Section: Users register and verify their accounts with Email Verification to access books and make purchase with Payment integration and Payment Verification.
- Admin Section: Admins can upload new books, manage user roles, and update book information. The backend uses Multer for file storage, Jsonweb token for secure registration, and Bcrypt js for password hashing.
